

CAPABILITY STATEMENT – EPOS SCHOOL OF HEALTH

OUR VISION

EPOS School of Health is leading institution for learning and excellence in training, teaching and research to build up, augment and sustain skilled human capital to meet effectively the ever emerging challenges, needs and priorities of the health sector.

INTRODUCTION

EPOS School of Health has access to more than 50 years of international and national institutional experience through health policy and systems work in over 70 countries managing over 200 technical assistance assignments for clients ranging from countries to individual hospitals, from multilateral agencies to regulatory bodies.

The wealth of this experience is crystallized by EPOS School of Health through innovative applications and adaptations and is offered as packages of know-how and skills to existing and aspiring professionals in the health sector.

For over two decades, EPOS has groomed managers and leaders in public health. Today EPOS School of Health continues to break new ground in areas as diverse as public health management, global health, applied health research, health policy and systems, health insurance, health communication, hospital management, civil society participation and the interrelationship of ethnicity, culture, and health.
